

PUBLIC NOTICE

LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION MANDATORY LANGUAGE - TIER III

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Lower Valley Water District has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During year 2014 we did not monitor or test for lead and copper and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for lead and copper, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
<i>Lead and copper tap water sampling</i>	<i>annual</i>	<i>0</i>	<i>2014</i>	<i>2015</i>
<i>Lead and Copper entry point sampling</i>				
<i>Water quality parameters</i>				

What is being done?

We are working to correct the problem. For more information, please contact Phillip Marin at 915-791-4480 ext. 1113 or pmarin@lvwd.org.

We are successfully monitoring and testing lead copper every 6 months with the assistance of a professional environmental firm. We have developed and submitted a monitoring plan to TCEQ for approval. 60 samples are taken by LVWD customers throughout the District.

This notice is being sent to you by Lower Valley Water District. Public Water System Number: TX0710154
